DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 is somewhat confusing as to exactly what is being claimed. While the claim sets forth in line 1 a blade supporting mechanism **for** a wiper apparatus, line 9, positively sets forth the body mounted at a pivotal connection of the main lever and line 11 positively sets forth the stabilizer mounted in the arm portion. Based on the preamble of the claim, the claim appears directed to only the subcombination of a supporting mechanism, while the body of the claim positively couples the mechanism to the wiper apparatus, thus claiming the combination. It appears line 1 should set forth ---A blade supporting mechanism in a wiper apparatus...--- to remove confusion. Clarification is requested.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Tetsuya (JP publication 10-297437).

Tetsuya discloses the invention as is claimed, including a wiper apparatus (fig.1) with a blade supporting apparatus thereon. Tetsuya discloses a wiper blade (20) mounted to a leading end portion of a wiper arm (12,16). A middle portion of the blade is pivotally mounted to an end of the arm at connection (22). A support member (50) is provided in the arm and movably supports a portion of the wiper blade nearer to a shaft side of the arm than a middle portion of the wiper blade. The supporting member has a concave portion therein to receive and support the wiper blade (fig.2) and includes a plurality of ribs (60) extending toward window surface (14, see fig. 2).

With respect to claim 2, note upper piece portion (54,56) fixed to the wiper arm (12).

Allowable Subject Matter

Claim 3-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

It appears, based on what applicant is attempting to claim, claims 15-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
